FUNCTION INTRODUCTION

INSTALLATION INSTRUCTIONS

❶ BATTERY INSTALLATION

Unscrew the battery cover and use the 18650 lithium-ion rechargeable battery with a rated voltage of 3.7V and install it with the positive pole facing inward to ensure that the battery cover is tightened.

COMMISSIONING INSTRUCTIONS

Commissioning

1. First adjust the diopter of the eyepiece after starting the machine. Everyone's vision is different. The first use requires debugging,
You only need to be able to clearly see the ruler and icon in the red box. It doesn't matter if other parts are clear or unclear.

COMMISSIONING INSTRUCTIONS

Commissioning

2. After we can clearly see the scale and icon in the red box, we can adjust the focusing wheel until we can clearly see it. The whole picture of Chu.

COMMISSIONING INSTRUCTIONS

1、The diopter adjustment only needs to be adjusted once when the same person uses it. It is to adjust the degree of the eyes and the display screen, which has nothing to do with the picture viewed.

2、The focusing wheel is used to adjust the degree between the machine and the viewing target, so when viewing different distances. You need to adjust the focusing wheel so that you can see the target more clearly.

COMMISSIONING INSTRUCTIONS

Turn on the IR mode, press and hold the "+" key, the picture will turn black and white, that is, the IR mode has been turned on, and then press and hold again to switch the first, second and third gear of IR and close. They are respectively weak, medium and strong gears. In order to save power, the weak gear can be seen clearly, so the medium and strong gears are not needed. Use color mode to view directly in daytime and light environment.

COMMISSIONING INSTRUCTIONS

- 4 Pull out manually

Enhance the spotlight by manually pulling it out. However, we must ensure that the infrared light is just shining on the display position of the screen, which can be adjusted by slightly swinging the infrared light to achieve the full black HD viewing effect (as shown in the figure)
